1. PRODUCT DESCRIPTION

GTM3526DT261XPA0 is an omni-directional miniature MEMS digital microphone with a package size of $3.5 \times 2.65 \times 1.3$ mm and a top-port for sound input. It consists of a MEMS sensor and an encoder IC, which converts sensor analog output signal into 1-bit digital PDM data. The digital output format eliminates AC coupling capacitor, reduces RF noise coupling, and eases PCB layout requirement.

GTM3526DT261XPA0 has high performance and reliability, that is, its sensitivity will not be affected by temperature, vibration, humidity, and/or time. It is able to endure lead-free soldering reflow process temperatures up to 260°C commonly used in the SMT process. Provided on tap-and-reel, GTM3526DT261XPA0 is ideally suited for those applications where the design requires the top-port input digital MEMS microphone.
